

SPACE WARS

It is the year 2030 and resources are scarce. A war is coming to outer space and it is up to you to protect your kind. Will you fight for the Red aliens or the Blue aliens in this epic game of SPACE WARS.

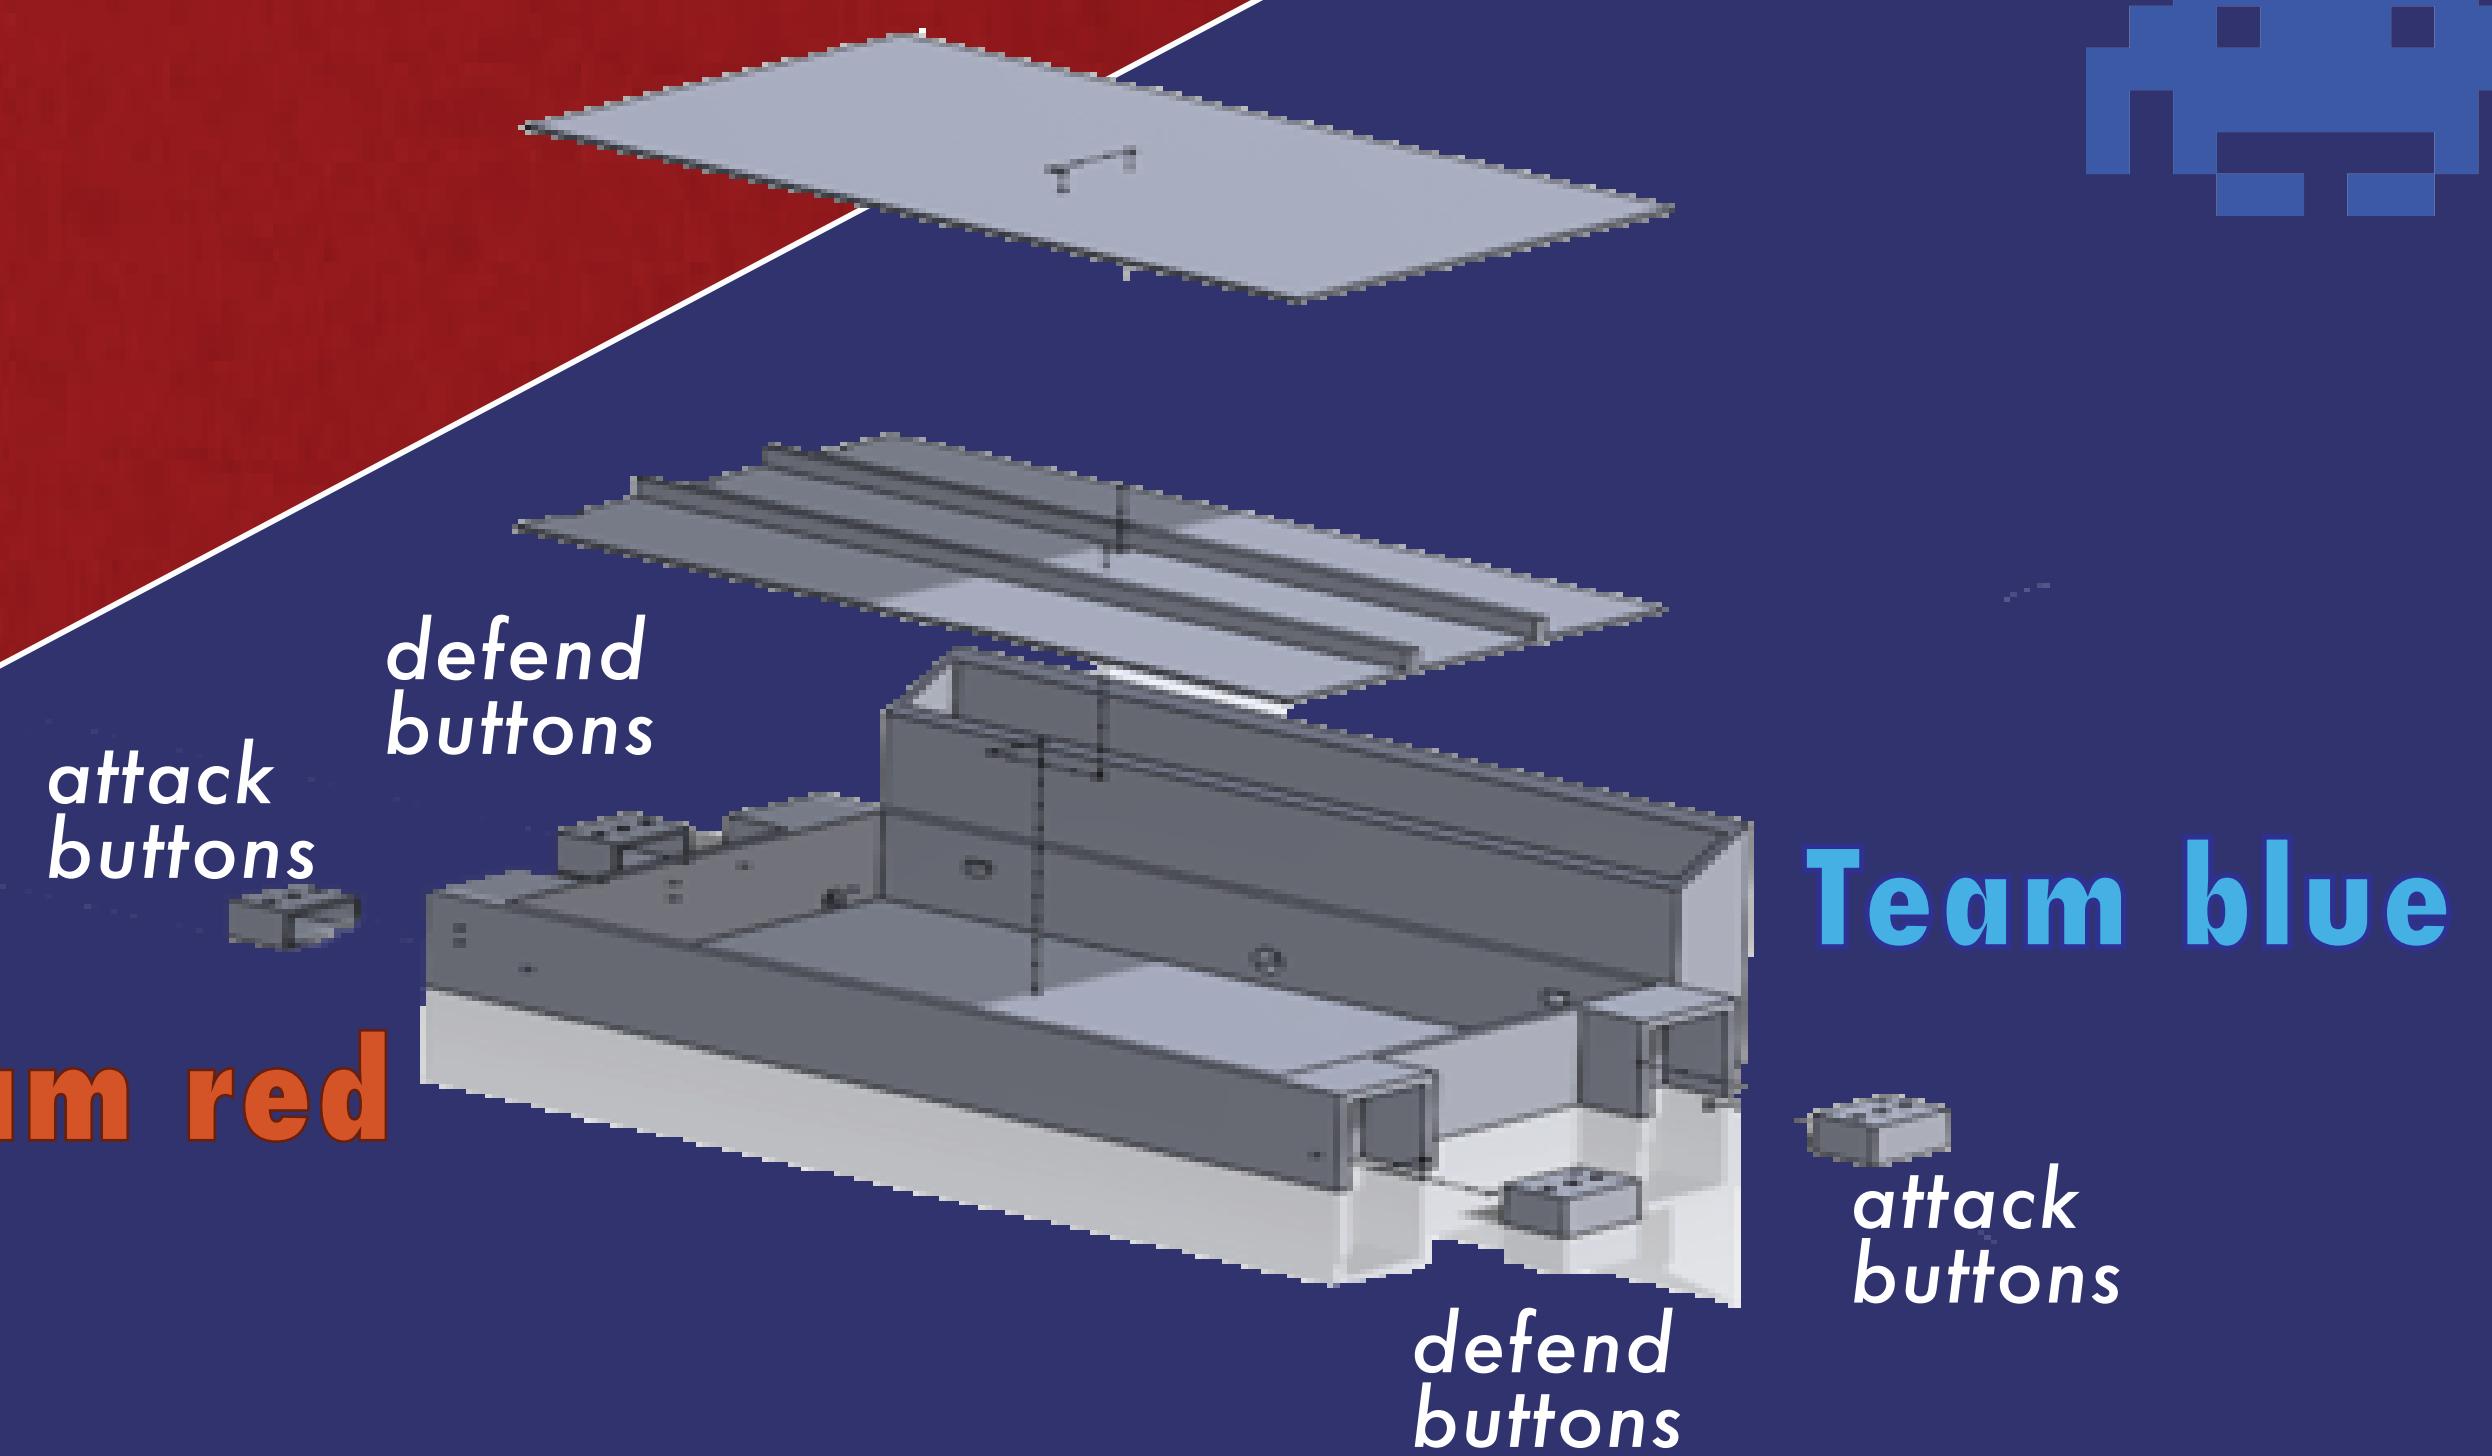

Inspired by the popular trading card game Yu-Gi-Oh!, space wars gives new life to this classic game design. Try to deal damage on your opponents or block their attacks in our fast-paced multiplayer game of luck-and-chance.

-----How to play-----

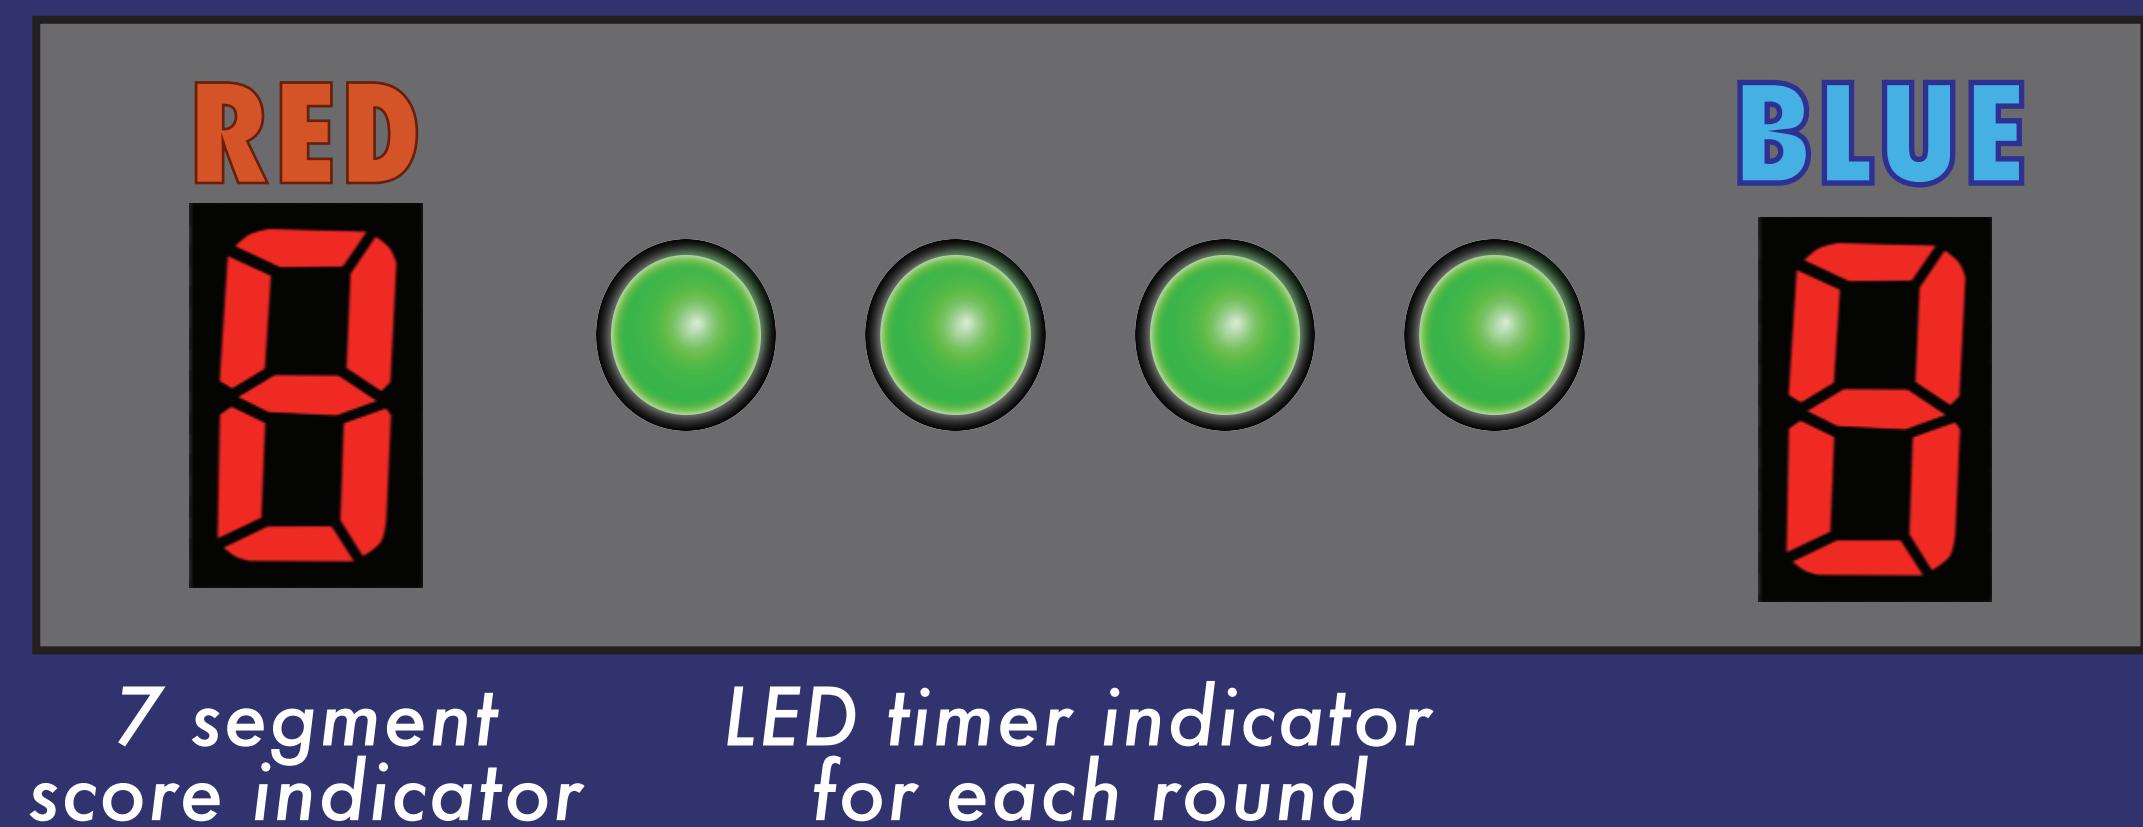

1. Each game progresses with a series of rounds governed by clock timer. In every round, players choose one lane to attack and one lane to defend.
2. After the countdown ends, the round commences and the corresponding LEDs 'row' lights up (red for attack, blue for defend)
3. If the player's attack was not blocked by the opponent, player scores a point! Likewise, if the opponent's attack is successfully defended by the player, the opponent does not score a point in that round.
4. First player to reach 9 points wins!
